

‘Natural World’

A celebration of 100 years of Sir David Attenborough, - inspired by his book ‘A Life on Earth’

Opening

INTRO:

One hundred years; we’ve seen our life on earth through your eyes
Witnessed the beauty our world holds and hides

VERSE:

What we’ve seen through all the scenes you’ve shown
Is that this blue planet isn’t ours alone
From the coral reefs to forest canopies:
There’s a treasury, a precious harmony

BRIDGE:

We are a part of the natural world
We are not separate from nature
We all depend on the natural world
We are not separate from nature

The truth is, it’s up to us,
Our fragile earth is in danger

CHORUS:

But there still is time
If we act now
We can put it right
If we act now

Verse 2:

From the endless plains up to the frozen poles
Our story still unfolds: it connects us all
But as the balance shifts
As systems come adrift
We must reset the clock:
We must re-wild the world

BRIDGE:

We are a part of the natural world
We are not separate from nature
We all depend on the natural world
We are not separate from nature

The truth is, it’s up to us:
Our fragile earth is in danger

CHORUS:

But there still is time
If we act now
We can put it right
If we act now

The world's not ours to own
It's ours to share or lose
And we must make a choice
While there's a choice to make

Slower:

What we do over the next five years
Will set the course for a thousand more
If we reset the clock
If we re-wild this world

Then our children's earth
Will have been worth it all

Slower, more thoughtful:

We are a part of the natural world
We are not separate from nature
We all depend on the natural world
We are not separate from nature.
